

Graham

Graham, who was diagnosed with Motor Neuron Disease (MND) in 2018 approached Wheels for All Kendal to ask if we had a suitable bike; one he could ride with one leg to enable him to lead a large group walk along Morecambe prom, in a fundraising event he had organised for the MND Association.

Our four wheeled fix geared bike with a toe clip and strap worked well for Graham, and he came regularly to ride the bike and build up his fitness in preparation for his aim.

His event raised over £7,000 and was a tribute to his son who sadly died before fulfilling his wish to fund raise himself for the MND Association who have supported his Dad so well.

Graham plans to make this an annual event with Wheels for All to fund raise for both charities to show his gratitude for our support with his cycling.
